

FLORIDA'S LEADING PRECAST COMPANY

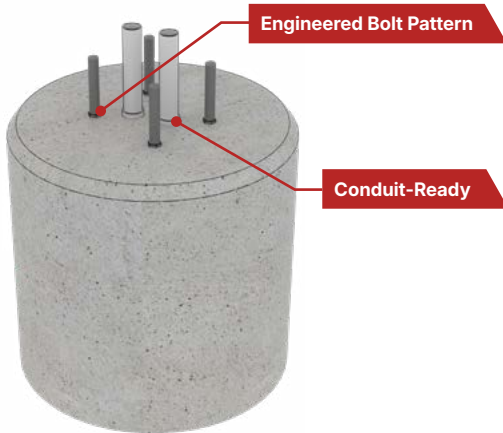

UTILITY LIGHT POLE & LIGHT POLE BASE PRODUCTS

Precast Specialties manufactures a full line of precast concrete **Utility Light Pole and Pole Base Products** designed to support site lighting, electrical, and data infrastructure—from standard base foundations for parking lots, roadways, and streetscapes to direct burial options for utility pole applications.

With fast turnaround and customizable conduit and bolt configurations, our precast solutions help reduce field work, improve alignment, and keep projects moving.

Standard Components

Light Pole Bases

Round concrete base, completely customizable to accommodate commercial, FDOT metal light poles to meet site requirements. Ideal for parking lot and roadway lighting where fast, consistent installation is critical.

Component Type	Diameter
Light Pole Base	18"
Light Pole Base	24"
Light Pole Base	30"
Light Pole Base	36"

Light Poles

Engineered for strength, durability, and reduced maintenance, these poles are built for direct burial, which are cost-effective solutions. 6" and 8" meter posts are available, and prestressed pilings for scoreboards are also offered.

Applications

Precast Specialties manufactures pre-stressed concrete light poles up to 114 feet, delivering long-span, corrosion-resistant solutions for sports fields, roadways, utilities, and high-mast lighting applications across Florida.

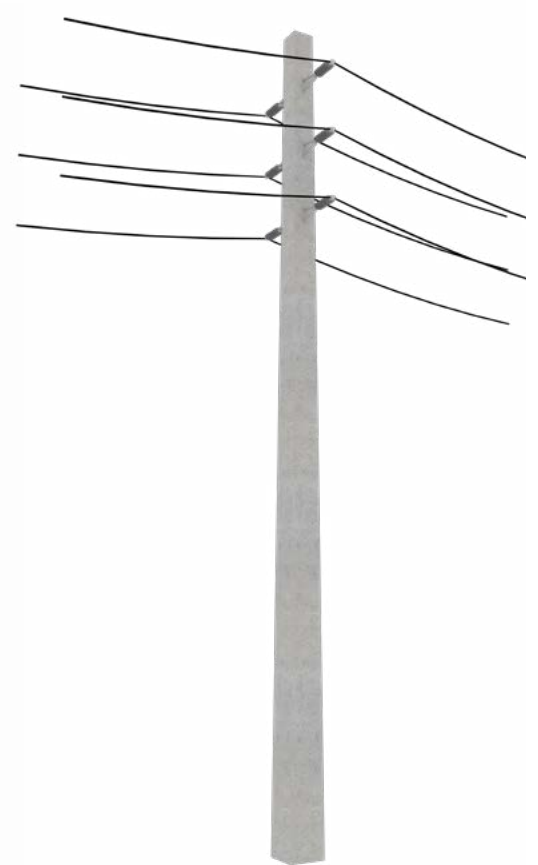

Component Type	Length
Light Poles	12' - 114'

Mast Arm Pole Lights
